CITY OF SUMNER NEWSLETTER

OCTOBER 2001

City Council Positions on Nov. 6 Ballot

Sumner voters will be casting ballots on two contested races for positions on the Sumner City Council in the Nov. 6 General Election.

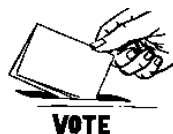

The Mayor position is also up for election but incumbent Barbara Skinner is uncontested as she seeks a second four-year term. David Enslow is uncontested for Position 2 on the City Council.

In the race for Position 1, Matthew H. Richardson is challenging incumbent Mark Evers who is seeking his second four-year term.

Richardson, 35, has lived in Sumner for four years and attends graduate school at the University of Washington, Tacoma. Evers, 38, is a seven-year resident of Sumner and owns a mortgage company.

In the race for Position 3, Steve Allsop is challenging incumbent Kristi Coppin who is seeking her third four-year term.

Allsop, 47, is a 22-year resident of Sumner and is manager of a Seattle finance and bonding company. Coppin, 50, is a lifelong Sumner resident and has served nine years on the City Council. She is a financial analyst at Good Samaritan Hospital.

City Hall Addition Open for Business

The expansion of City Hall to upgrade facilities and provide additional space for the Police Department is open for business. Open since August, the new east wing provides state-of-the-art facilities for Sumner's law enforcement. A secure dispatch facility is safer and more efficient than the prior building. Dedicated spaces for interviewing, interrogation, training, storage, and the holding of prisoners are provided on the addition's first floor.

The second floor of the new addition includes consolidated offices for Community Development, Public Works, and Finance Department. The combined offices allow customers to "one-stop-shop" for permits, utility improvements and information.

A prior addition, more than 30 years old, was demolished as a part of the project. Although the project architects closely examined the renovation of that space, the high costs of renovation

The expansion at City Hall houses the Police Department on the ground floor and City offices upstairs.

of the prior jail and police facilities made reconstruction more economical. When complete, the south portion of the property will be used for police and fleet vehicle parking.

The original 1935 building is being restored and will house the City's Administration and the Municipal Court. The City Council will continue to use the chambers that were built in the west end of the building.

New City Hall Addresses

As a result of the City Hall addition, City departments have new suite numbers. People mailing items to City Hall are encouraged to use the new suite designations. The original address remains the same:

1104 Maple St., Sumner, WA 98390-1423

- Suite 100 Court

MAYOR'S MESSAGE

This column is being written four weeks after September 11, 2001 and the terrorist attacks on the World Trade Center in New York. It has been a traumatic time for our country and more difficult times lie ahead. For now, I believe that we should get on with our lives. We need to be strong and not let fear change the way we conduct ourselves. Therefore, as usual, I am submitting my quarterly report on what's been happening in Sumner.

"Music Off Main," the Friday concerts in Heritage Park this summer, was sponsored by the Sumner Arts Commission, which chose the artists and managed the events. There was a great feeling of community, sitting in the crowds on the grass and listening to the concerts.

The first weekend of August, the 28th Annual Sumner Festival was a great success. The second weekend in August held the 2nd Annual Cancer Relay for Life, and they raised an astonishing total donation of nearly \$150,000. The third weekend was the 10th Annual Courage Classic Bike Ride, for Mary Bridge Children's Hospital. The ride was canceled because of forest fires around Leavenworth, although the riders turned in their donations. The ride next year is being called "10 Again!"

On Sunday, September 23, the 2nd Annual "Classy Chassis Car Show" was sponsored by the Sumner Promotion Association. The SPA must

have some special angel riding on their shoulders because the weather was perfect again, sunny and warm. From 9 a.m. to 3 p.m., 450-plus cars parked on Main Street and all the side streets and parking lots off Main. From KC's to Wood Avenue, hundreds of visitors strolled the streets. Downtown restaurants and shops were open so people who were tired of cars could eat or shop. Thanks, SPA, for a wonderful, fun show!

Barbara Skinner

Sumner has a few projects that are nearing completion. City Hall will be finished by the end of the year. The Skateboard Park is nearly completed. We have to get the sidewalks and landscaping done before the bad weather hits so we will hopefully have that work finished in a couple of weeks. The four lanes of Traffic Avenue should be ready for use by the end of October. The traffic light, landscaping, and finishing touches will be completed by next spring.

The Homecoming Parade was held October 5th. It was a fun community get-together.

As always, please call or write to me with any suggestions or questions. (253-891-3318)

Historic Map of Sumner Restored

An old map, dating back to 1891, adorns the Permit Center lobby in City Hall. One of the original town maps of Sumner, it shows the original Whitworth College, a diagonal street grid that was later changed, and the original locations of the Puyallup and Stuck Rivers.

The map hung in City Hall and saw heavy use over the years. Holes, tape, sunlight and humidity all severely damaged it. It spent the past few decades in its own wooden box.

Last year, paper conservator Alice Bear began the meticulous and detailed restoration of the map. Using methylcellulose paste, Japanese paper, dry cleaning fluid, and paint she was able to restore the map, returning it to the City 13 months later. It was framed using archival framing by Sumner Art and Framery.

The map and information about the restoration can be viewed at the Permit Center in City Hall.

CITY ADMINISTRATOR'S MESSAGE

The terrorist attack on our nation on September 11th has caused the City of Sumner to take pause and reflect on our national pride and resolve. The management team is reviewing our own emergency procedures so that our preparedness is sound. The tragic loss of the rescue workers in New York has bolstered our pride in our firefighters, paramedics, and police officers. Sumner's public safety team is vital to this community.

The City staff has begun its work on the 2002 budget, and each department has submitted budget requests. Unfortunately, the two largest sources of revenue for the City's general fund are not growing at the rate that our staffing costs are increasing, so that budget balancing will be a challenge. Sales tax citywide is running about 10 percent lower than last year's projections, and property tax may be limited by an upcoming initiative to a one percent increase. These two taxes provide about two-thirds of the general fund's revenue; the City's public safety departments (Police, Fire, Municipal Court) make up the majority of the general fund expenditures. The City's commitment to its personnel includes salary cost of living adjustments tied to the area's official inflation rate, which in all cases exceeds one percent.

Our new City Hall building is not yet fully complete, but we moved into the new "east wing" in August with a tremendous sense of satisfaction. At long last, the Sumner Police Department has enough space to allow its members to work in a professional environment, and the Permit Center counter is adjacent to the Finance Department, which fosters a much better customer service system. City staff is looking forward to final completion of the remodeled section of the old City Hall in November.

– Andrew Neiditz
City Administrator

Andrew Neiditz

Expansion Planned for Senior Center

The Sumner Senior Center is preparing for an expansion project next spring or summer that will add 1,000 square feet to the east side of the building, located at 15506 62nd St. Ct. E. (a block west of the QFC shopping plaza). The expansion will increase space in the main dining area and add one or two classrooms. Parking lot lighting and the building's sprinkler system will be improved.

The center is popular among area seniors.

The \$150,000 project is being paid for through a variety of sources including City and County funds, and \$18,000 collected by the Senior Center through fund-raising activities.

The Sumner Senior Center is a popular place among area seniors, who come not only from Sumner but surrounding communities. Just during the first nine months of 2001 there have been 1,500 new participants at the center. The total number of Senior Center visits is estimated at 2,500 per month.

The main attraction is the lunch program where seniors can enjoy a hot meal, often times live entertainment, and the companionship of fellow senior citizens. Afterwards, they can play card games or participate in special classes/workshops in topics such as wood carving, ceramics or line dancing. Health and wellness programs also are offered. Occasionally the seniors will pile into the Senior Center van for a field trip to an outlet mall, fair or some other destination. Another smaller van provides rides to and from the Senior Center two days a week for Sumner residents.

The Sumner Senior Center is open weekdays, 8 a.m. to 4:30 p.m. Guests are always welcome. For more information, call the Senior Center at 863-2910.

New Director at Sumner Senior Center

Bruce Johnson is the new director at the Sumner Senior Center, having started in late August. Previously, Mr. Johnson was director at Highline Senior Center in Burien for four years. He retired from the Air Force in 1995 after 23 years of service. He holds a masters degree in Public Administration from Troy State University.

Bruce Johnson

On taking the director's position, Mr. Johnson was greatly impressed with the Sumner Senior Center calling it the "best senior center I've ever worked at, as far as the facility."

Reward Offered for Reporting DUI's

The DUI Reward program began last November in Puyallup. Having such success Sumner, Fife, and Bonney Lake joined the program in August of this year.

The program encourages citizens to call 911 to report a drunk driver and if that call results in an alcohol citation, the caller receives a reward. The reward is a \$50 gift certificate at a local shopping mall.

The program is funded by a grant from the Washington Traffic Safety Commission, which will pay for the road signs, and from the Tacoma/Pierce County DUI Victims Panel, which will pay for the rewards. The program is sponsored by the Tacoma/Pierce County DUI Task Force and Victim Impact Panel. For additional information, visit the Police Department or call 891-3371.

Summer and Fall Events Attract Crowds Downtown

From the Classy Chassis Car Show to the Summer Arts Festival, downtown Sumner was the place to be this summer and fall for the various events and activities. The festivities, held mostly under sunny skies, attracted hundreds of local residents.

CLASSIC CAR SHOW: Hundreds turned out under sunny skies and warm temperatures for the Second Annual Classy Chassis Classic Car, Rod and Truck Show in downtown Sumner on September 23.

HOMECOMING PARADE: Football players and cheerleaders with the Valley Football and Cheerleading Association march down Main Street in downtown Sumner during the Sumner High School Homecoming Parade on October 5. Right, homecoming queen Miranda Jacobsen waves to the parade spectators.

A large crowd enjoyed food booths, activities and displays at the 28th annual Sumner Arts Festival on August 3 & 4.

SUMMER CONCERT SERIES: The Vela Luka Croatia Dancers entertain the crowd July 20 at the first in the summer concert series, Music Off Main, held at Heritage Park.

COMMUNITY EVENTS

Pumpkin Carving Event Oct. 27

There are several upcoming traditional holiday events to wrap up the last few months of 2001. The Sumner Fire Department will be hosting its annual Pumpkin Carving Event on October 27, 2001, from 9 a.m. to 2 p.m. Food and cash donations will be accepted for the Food Bank in exchange for free pumpkins to be carved at the Fire Department.

Merchants Welcome Trick-or-Treaters

On October 31, the downtown merchants will be staying open late for Trick-or-Treating beginning at 5:30 p.m. until the treats are all gone.

Pancake Breakfast, Santa

Another Fire Department annual event will be the Pancake Breakfast on Saturday, December 1. All revenue from ticket sales will go toward helping area families during the holidays with the help of your donations. Santa plans to appear in Sumner neighborhoods to assist the Sumner firefighters in handing out candy canes three special days in December. Dates and times may vary dependent upon call volume and fire fighter availability.

Planning Underway for East Main Street Improvements

The City is reviewing current policies and regulations that will shape future developments along East Main Street to make it friendlier for pedestrians, increase business, and echo the character of Downtown. East Main Street is between Valley Avenue and 160th Avenue.

On October 2 the Community Development Department sponsored a community workshop to seek comments on the alternatives for future designs of East Main Street. The public, property owners, decision makers, and key staff members participated in the discussions. It was also an opportunity to talk about how to improve pedestrian safety. The alternatives that were considered included allowing on-street parking on East Main Street, requiring all new parking lots be behind buildings, bringing buildings closer to the street, widening sidewalks, and making safer crosswalks and putting stoplights at key intersections. Staff will be making changes to these alternatives based on comments received. The City Council will consider the draft East Main Street Design Strategy in the coming months.

For more information contact: Ryan Windish, Senior Planner at (253) 891-3301.

Traffic Avenue Widening Project Wrapping Up

The newly widened Traffic Avenue will be open to four lanes soon. Rodarte Construction is completing the project that will improve access to the City's downtown and industrial area. Landscaping work will be completed this fall. The street improvements at the intersection of Thompson Street will likely be done early next year.

The project is primarily funded by a grant from the State of Washington, with additional support from Sound Transit, the City, and the adjacent car dealers.

Grant Helps City Buy River Park Site

Sumner recently was awarded a \$566,000 Conservation Futures grant from Pierce County to complete the purchase of a future park site along the White (Stuck) River. The site, known as Riverbend Park, is on the west shore of the river at the end of 16th Street S.E. The park will be approximately eight acres, and includes 1,200 feet of shoreline. The site is planned primarily as a natural open space with picnic areas and parking. It also is planned to be a key trailhead for the Sumner-Pacific White River Trail.

The first phases of the White River Trail are currently being designed. Construction is planned for next year, and will extend from the intersection of 142nd Avenue and 24th Street S.E., across the river on a pedestrian bridge, and south 3,500 feet along the river's eastern shore. A second section of the trail, also planned for construction in 2002, would provide a loop along both sides of the river between the 142nd Street and Fryar Avenue bridges.

The eight acre park site includes 1,200 feet of shoreline along the Stuck River near Sumner Meadows Golf Links.

A master plan for the White River Trail was completed in 1996 as a joint project between the Cities of Sumner and Pacific. The trail will provide a connection between the Interurban Trail (which extends south from Seattle to Pacific) and the Foothills Trail (which ultimately will connect Sumner to Orting, South Prairie, Carbonado and Buckley).

For more information on the White River Trail or Riverbend Park, contact Community Development Director Leonard Bauer at (253) 891-3300.

Plan Will Guide Transportation Improvements

A transportation plan for the City of Sumner is currently being developed by a consulting firm, Transpo Group of Seattle. When completed and adopted by the City Council, the plan will become part of the City's Comprehensive Plan and will guide improvements to the transportation system in future years.

The main purpose of the plan is to identify transportation needs for the next 20 years and provide solutions to meet those needs. The plan identifies problem areas in terms of inadequate roads or lack of capacity on existing roads and establishes a capital improvement program to maintain an adequate system of roads, highways and other transportation measures.

The state Growth Management Act requires concurrency, meaning that

roads and other public services be developed at the same time as residential developments that increase demand on such services. The Transportation Plan being developed will determine the share developers will be required to pay for new roads through impact fees.

A Technical Advisory Committee made up of transportation officials from neighboring jurisdictions is being set up to examine regional transportation needs and coordinate corridors that serve more than one community. A Citizens Advisory Committee also is being established to help identify transportation needs and set street standards for new developments. If you want to participate, call City Hall.

The Transportation Plan is expected to be completed in early 2002.

SUMNER POLICE DEPARTMENT

Siren Serves as Evacuation Warning

Sumner does have a siren capable of warning Sumner citizens of a major threat from Mount Rainier. Last year the City of Sumner moved to acquire a warning device for the purpose of announcing a warning to area residents to evacuate the City in the event of a "lahar" or mudflow originating from Mount Rainier. The siren will serve no other purpose other than to serve as an evacuation warning.

The siren is located atop a 60 foot telephone pole on school property, at the east end of the Sumner High School football stadium. The siren, which was manufactured by the Federal Signal Corporation, has an approximate 130 decibel output level, which is equivalent to a jet engine and will deliver high sound output for an area up to four square miles. Other sirens, capable of serving the north and south ends of the City, are currently being studied.

Many people have inquired about peri-

odic testing of the siren. The Federal Emergency Management Agency (FEMA) and Pierce County Emergency Management recommend that sirens not be tested. Siren testing throughout the United States reflects that people become desensitized to the sound and generally do not respond as desired. Consequently, Sumner has the ability to test the device and check its functioning without having to actually sound the siren. The siren is being designed to be activated by radio signals received from the police department.

Look for community awareness briefings to be conducted in early November that will address a number of emergency management issues, including historical data pertaining to Mount Rainier and the Puyallup River Valley, evacuation routes, disaster preparation recommendations, and public notification plans.

We wish to emphasize that there is no

The alarm is situated at a parking lot next to the Sumner High School football stadium.

information that suggests that Mount Rainier presents a current hazard to Sumner or any other surrounding community. These measures have been initiated by Sumner just in case the mountain does become active sometime in the future and threatens those of us living on the valley floor below.

Parents Should Teach Children Walking, Biking Safety Basics

A Message From Jeff Engel, Sumner PD School Resource Officer

With the new fall season begins the new school year with many of our younger children walking to and from school. This is a good time to review the basics of bicycle and pedestrian safety laws. There are many wonderful places to walk or bike in Sumner, to one of the many City parks, the library, the downtown shops, to school, or a friend's house.

Walking

Just what can you do to protect your children against injury or death resulting from a pedestrian accident? First of all, set boundaries for your small children. Show them where they can play safely and the limits beyond which they cannot go and be prepared to enforce your rules. Second, as your children grow older, teach them the

basic rules for crossing the street safely. One of the best ways to do this is to take a walk with them, demonstrating and explaining the correct way to cross as you go along. Being a good example every time you cross the street with them might be the most important thing you do in helping your children become careful pedestrians.

Children need to be taught to STOP at the edge of the street and look LEFT, RIGHT and LEFT again for vehicles before crossing. Ask children what they see to determine that they know what they are looking for and not just turning their heads. Children should be taught to wait until the vehicle stops before venturing out into the street. Always walk on the sidewalk. If there is no sidewalk and you must walk on the road, always walk FACING traffic, so you can see any car that might be out of control. Dress to be seen; brightly colored clothing makes it easier for drivers to see you during the daytime. At night, wear special reflective materials on your shoes, hat

or jacket to reflect the headlights of cars coming towards you.

Bicycling

Give hand signals before turning or stopping. For a left turn, point left with your left hand; for right turns, point upward from your elbow with your left hand, or point right with your right hand. To stop or slow down, point downward. Ride single file or two side-by-side when on public roadways. Wear a bicycle helmet.

Head injuries cause most bicycle-related deaths. Ride predictably and defensively. Avoid weaving in and out of the parking lane. Leave about three feet between yourself and parked cars so that an opened car door will not block your path.

If you have any questions or concerns, feel free to contact School Resource Officer Jeff Engel at 891-6051.
